
DEPOCAM 16.0 installation

Table of Contents

1. Read this first	1
2. Installation of DEPOCAM software with a dongle	2
3. Enter a new DEPOCAM license code on your dongle	5

1. Read this first

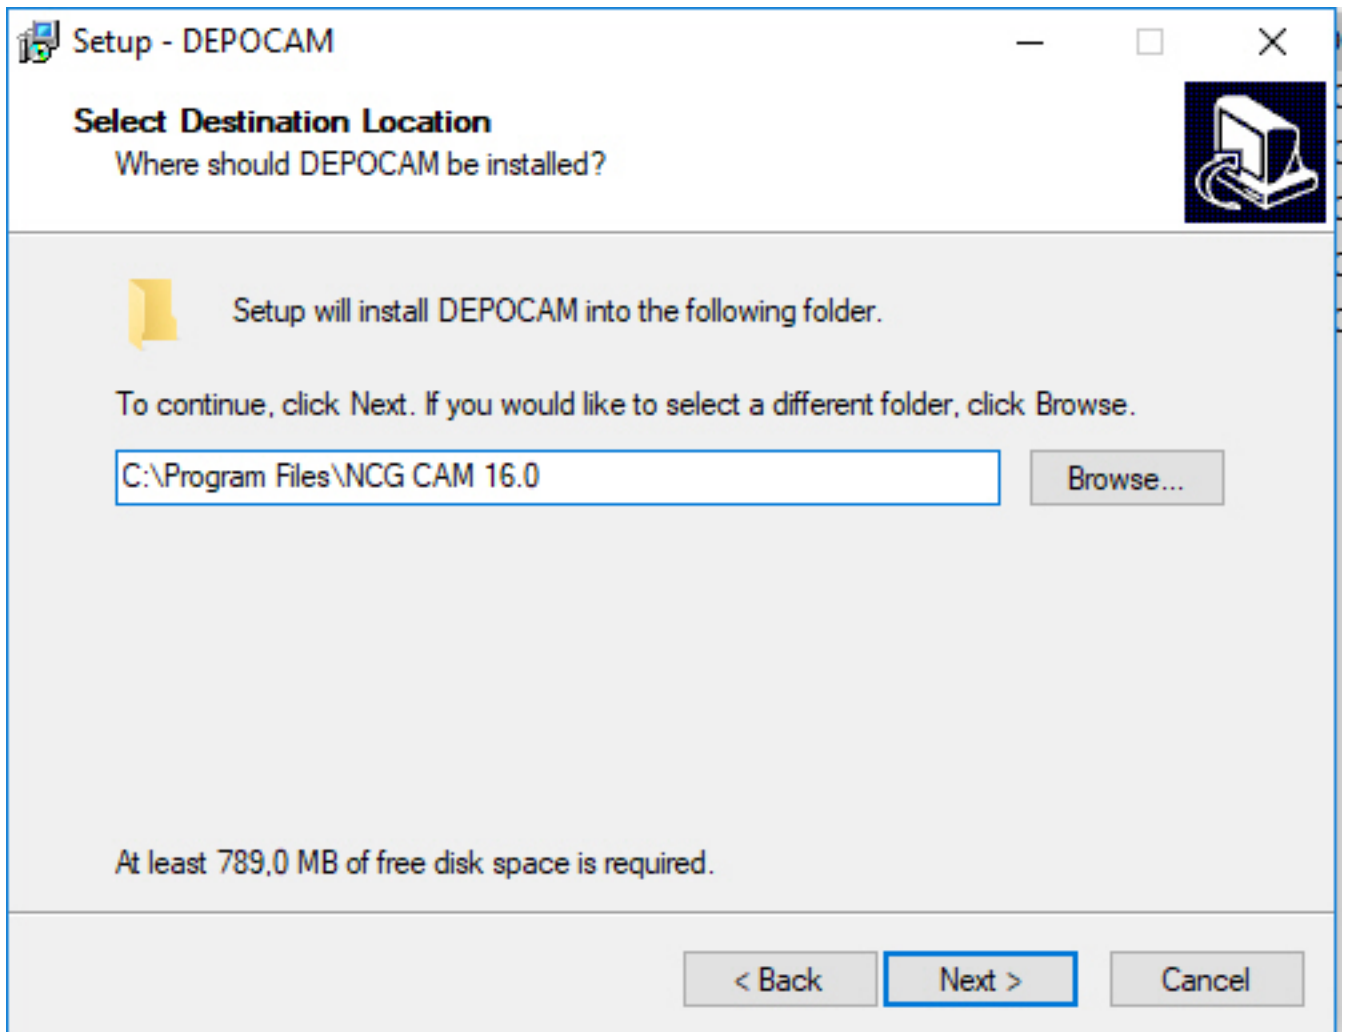

To license the software a dongle is required. You should have received this dongle from your vendor. The purchased options (**catia v4, catia v5, parasolid, step, 5-axis**) will be stored on the dongle.

You will find a description of the installation routine in the section [Installation of DEPOCAM with a dongle](#).

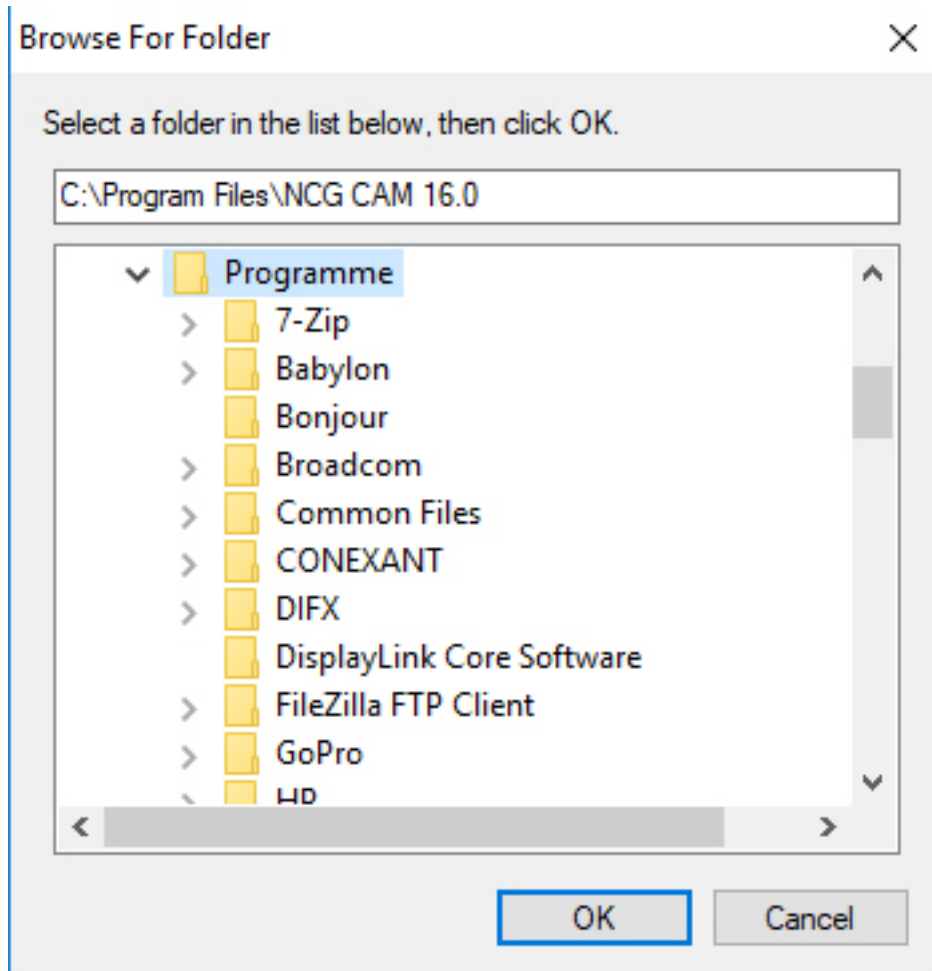

2. Installation of DEPOCAM software with a dongle

Following you will find the installation steps of DEPOCAM

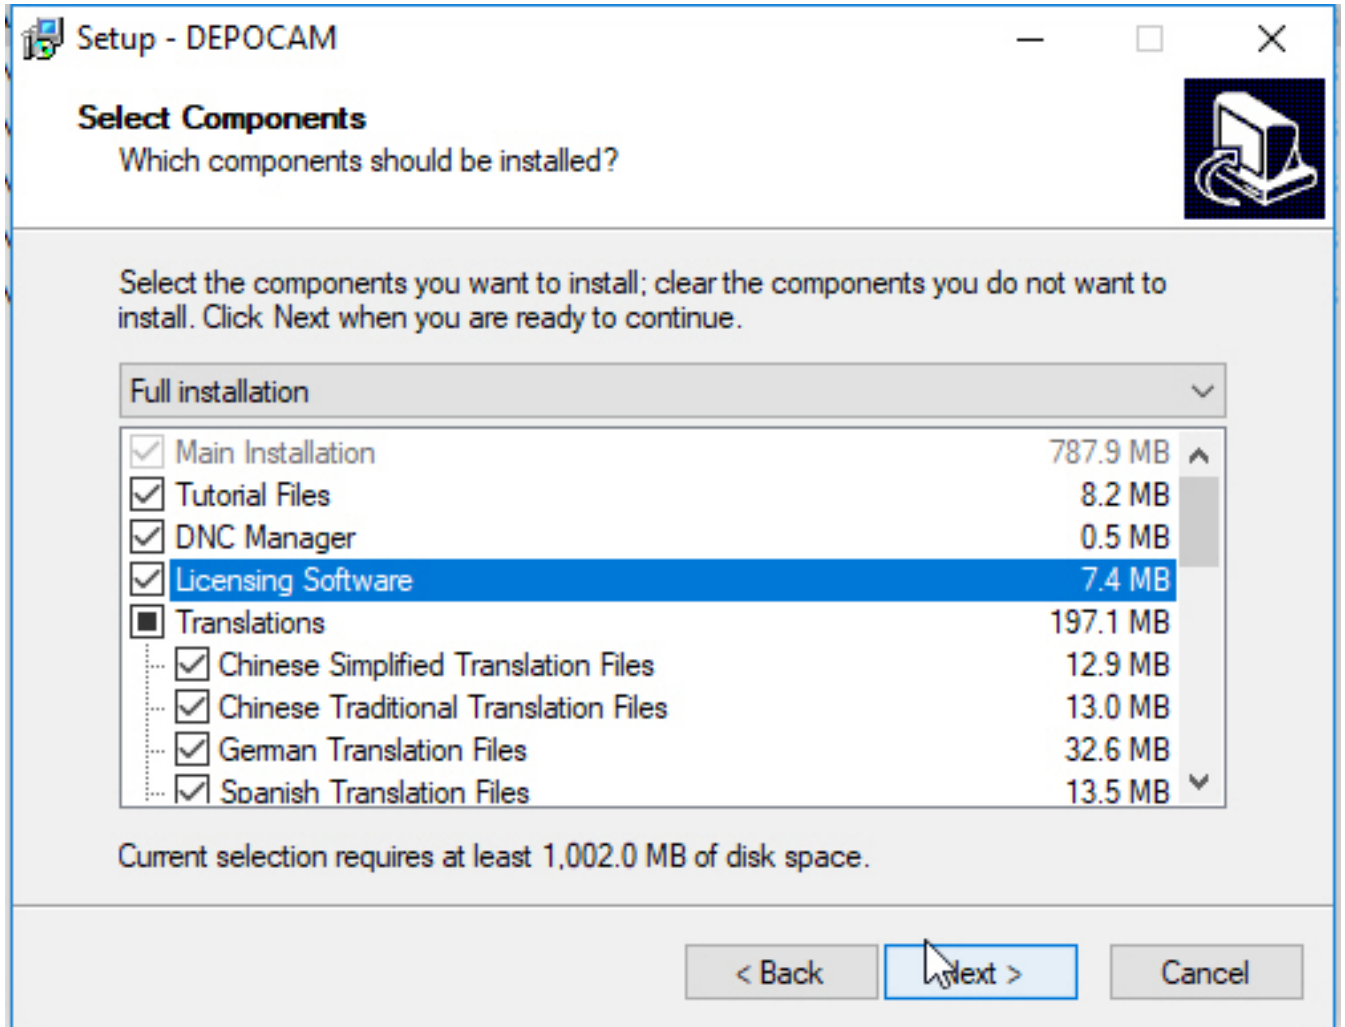

- Run the file **DEPOCAM16.0.nmmmmx64.exe** stored on the installation cd if you work with a 64 bit operating system. (nn-mmm are the release numbers of the version 16.0)
- If you want to install DEPOCAM on a different drive than drive c you can choose another installation drive:

Click on **Browse** and select the drive where you want to install the software.

- Follow the installation instructions up the dialog **Select Components**:

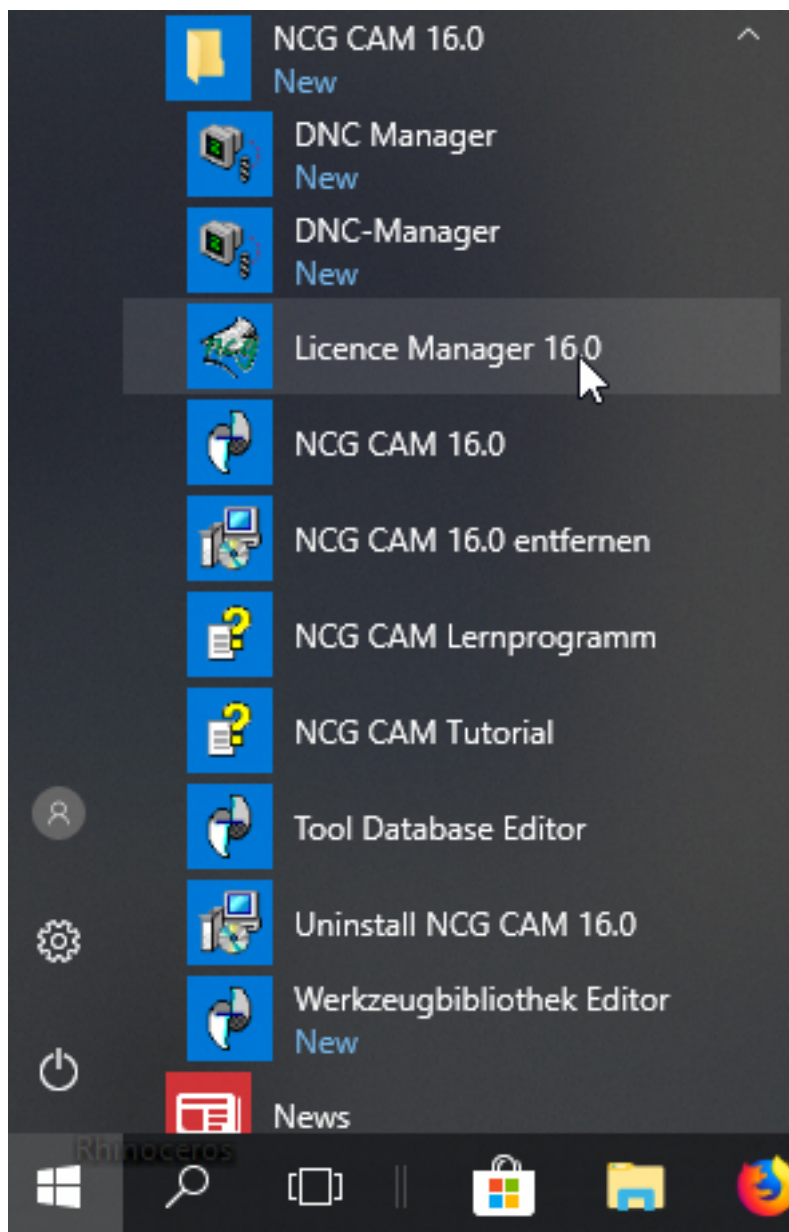

Be sure that you have ticked the option **Licensing Software** on. Without this option you will not be able to enter the license code for the DEPOCAM version 16.0 software later.

- Continue the installation and follow the instructions shown on the screen.
- Restart your computer after the installation

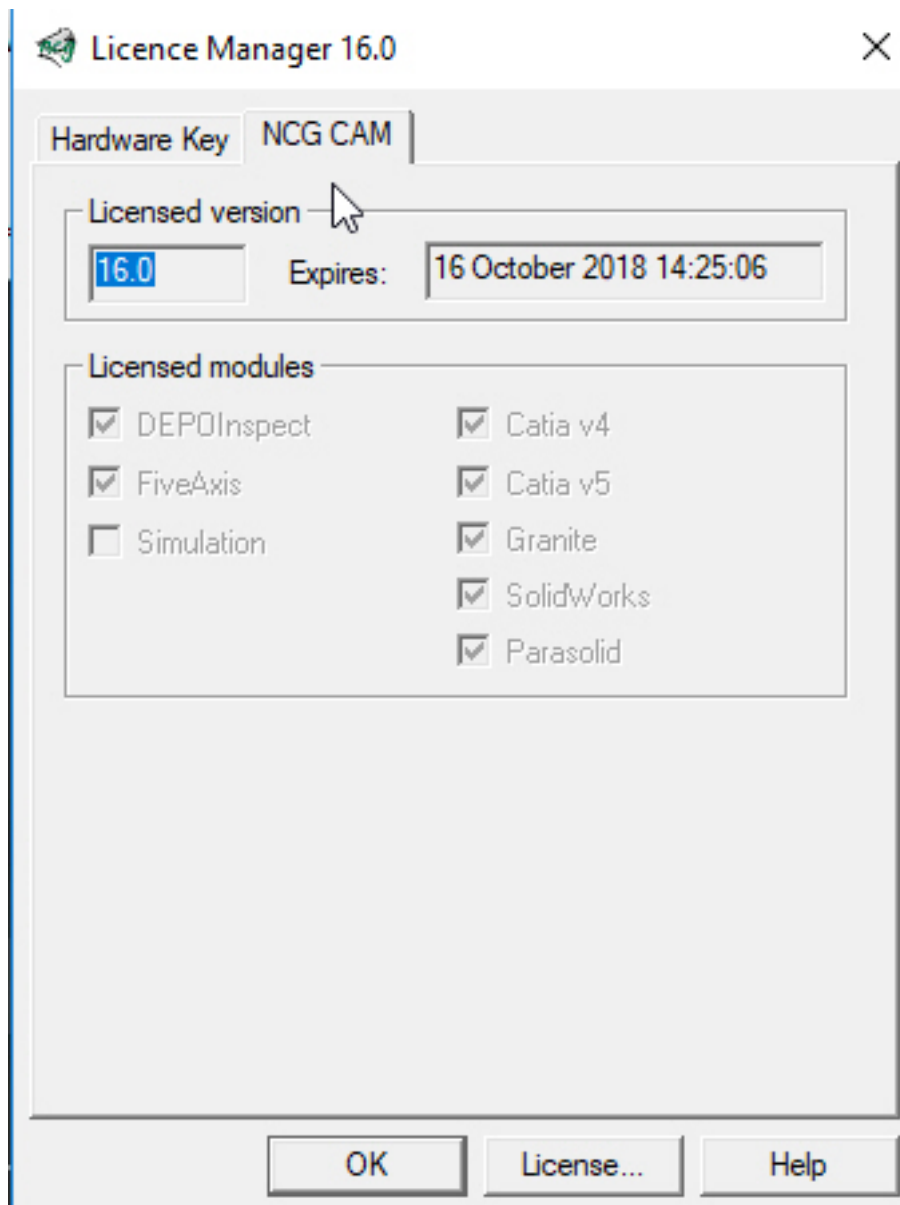

3. Enter a new DEPOCAM license code on your dongle

If you upgrade to a new DEPOCAM version or if you purchase a new option you will receive a new license code. This license code must be programmed to your dongle you did receive with the software.

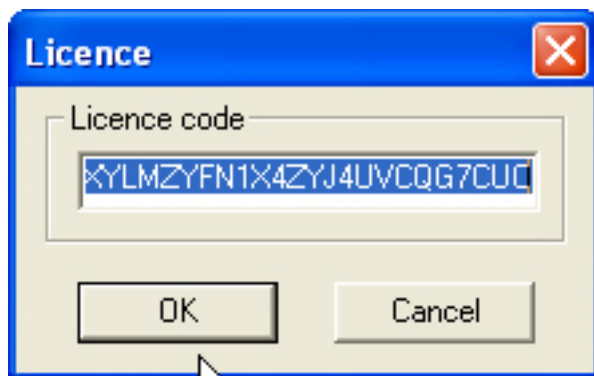

- Run the Licence Manager which has been installed with DEPOCAM. Start->All Programs->DEPOCAM 16.0->Licence Manager

- Click with the mouse into **Licence ...**

- and enter the license code.

- Your dongle has been successfully programmed with the new license code. Close the license manager.
